

# Practical-2

## 1. Multiplication and division

```
a=10
b=10
//multiplication
mul = a*b
disp("multiplication",mul)
div = a/b
disp("division",div)
"multiplication"
100.
"division"
1.
```

## 2. sqrt of 2579144256

```
x=sqrt(2579144256)
disp("square root of 2579144256 =",x)

"square root of 2579144256 ="
50785.276
```

## 3. factorial

```
function facto(n)
    fac=1;
    for i=n:-1:1
        fac=fac*i;
    end
    disp("Factorial of n is",fac)
endfunction
```

```
-> facto(7)
"Factorial of n is"
5040.
```

## 4. Pi and Imaginary value

```
x=%pi
disp("Value of pi",x);
y=%i
disp("Value of imaginary value",y);
"Value of pi"
3.1415927
"Value of imaginary value"
0. + i
```

## 5.Undefined variable

```
x=[];
disp("Undefined variable x",x)
x = input("Enter the undefined variable");
disp("Defined variable x",x)
"Undefined variable x"
[]
Enter the undefined variable16

"Defined variable x"
16.
```

## 6.List

```
lista = list([1], [2], [3])
```

```

disp("List :",lista)
lista(2) = "second"
lista(3) = "third"
disp("Modified List",lista)
"List :"
(1) = 1
(2) = 2
(3) = 3
"Modified List"
(1) = 1
(2) = "second"
(3) = "third"

```

## 7.Cell

```

cello = {1,"andaconda","hathi"}
disp("cello ",cello)
cello{1} = "sathi"
cello{2} = "serpent"
disp("Modified cello ",cello)
"cello "
1 "andaconda" "hathi"
"Modified cello "
"sathi" "serpent" "hathi"

```

## 8.Struct

```

home = struct(...
"name","home sweet home",...
"no","77",...
"Location","Earth",...
"medium","AIR"...);

disp(home.name,"Name");

```

```
disp(home.medium,"medium");  
home.speacies="Dinoanimamoth";  
disp(home.speacies,"speacies");  
"home sweet home"  
"Name"  
"AIR"  
"medium"  
"Dinoanimamoth"  
"speacies"
```
